

FOOD CONTACT DECLARATION OF COMFORMITY

The manufacturer, established in the European Community:

*TOMAS BODERO, S.A.
P.I.LOS PEDERNALES
C/PIEDRA DE SILEX, SN
09195 VILLAGONZALO PEDERNALES
BURGOS
TEL:34-947474226*

Declares that the new personal protective equipment described hereafter:

- *Protection glove: VTP40: transparent powdered vinyl.*

Is in conformity with the provisions of Regulation EC 1935/2004: materials and articles intended to come into contact with food and Regulation EC 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food. It is identical to the PPE, which is the subject of the test number 2015TM0722

*Issued by AITEX
Plaza Emilio Sala, 1
03801 Alcoy
Alicante*

Standards: UNE-EN 1186-9: 2002 and Regulation 10/2011 of the commission on January 14th. 2011.

Concept: this test is intended to determinate the overall migration and specific migration in food water-based simulants of plastic materials intended to come into contact with food, by filled samples at selected temperatures and times.

Testing conditions:

Simulants:

- Simulant B: Acetic Acid 3%
- Simulant D1: Ethanol 50%
- Simulant E: Tenax

Testing conditions:

- 2 hours at 40°C
- Simulant contact by filled samples

ENSAYO TEST	NORMA STANDARD	RESULTADO RESULT (mg/dm²)
MIGRACIÓN GLOBAL EN ACIDO ACETICO 3% (Simulante B) <i>GLOBAL MIGRATION IN ACETIC ACID 3 % (Simulant B)</i>	UNE-EN 1186:9-2002	< 1
MIGRACIÓN GLOBAL EN ETANOL 50% (Simulante D1) <i>GLOBAL MIGRATION IN ETHANOL 50 % (Simulant D1)</i>	UNE-EN 1186:9-2002	7,2 ± 0,2
MIGRACIÓN GLOBAL EN TENAX (Simulante E)* <i>GLOBAL MIGRATION IN TENAX (Simulant E)*</i>	Método propio / <i>In house method</i>	< 2

The overall migration values obtained with the simulants B, D1 and E are lower than the maximum limit of migration established in 10 mg/dm², according to REGULATION (EU) N° 10/2011 of the commission on January 14th. 2011 regarding materials and plastic objects intended to come into contact with food.

The material complies correctly with the Regulation, regarding the overall migration of the components and the simulants B, D1 and E so we can determine that they may stand in direct contact with aqueous, acids, alcoholic, dairy and dry foods.

Made in Burgos, February 3th. 2016.
